

# VisiSpecs® Pricing Matrix

VisiSpecs user licenses are just \$139/user/month for most implementations and as little as \$59 for very small firms. Customers can justify the cost of VisiSpecs in just 1-2 hours of time saved per month which users are seeing far more! The upside includes reduced IT management costs, access to centralized project files and data, improved team collaboration, coordination and verification of construction documents, customizable reports, and more. Differentiate your firm's services and products while delivering higher quality products with VisiSpecs.

<b>Company Edition</b> is the standard price point and includes all functionality as well as the option for local server deployment, dedicated servers, and volume user and multi-year discounts.	<b>Starter Edition</b> is for startup firms and consultants requiring just 1 or 2 licenses of VisiWord for spec writing time savings and product quality improvements.
<b>Team Edition</b> is for small teams or deployments for up to 5 licenses and includes the VisiRevit and VisiWord functionality.	<b>Floating Licenses</b> are available instead of the Per Named User licenses for a 50% uplift. Floating Licenses (aka Network Concurrent Use Licenses) offer flexibility, ease of deployment, and ease of use enabling many more company employees to install, register, use, and benefit from VisiSpecs. Floating licenses may also be reserved for specific users who always need a license available.

	Starter	Team	Company
Pricing Per User Per Month Billed Annually	\$59	\$99	\$139
Pricing Per User Per Month Billed Monthly	\$89	\$149	\$209

## Notes:

A Corporate Account may contain one or more active user licenses, all in same Edition (Starter, Team, or Company) and having the same expiration.

A Per User license is for an individual named user to login and access VisiSpecs project data. Floating licenses are shared by all Corporate Account users.

A Corporate Account can have Per Named User Licenses OR Floating Licenses (not a mix of the two).

Monthly subscriptions require an initial two month subscription on the initial order.

An expired or disabled user account will not be able to login to VisiSpecs until they become an active licensed user.

An expired account is maintained in the VisiSpecs Cloud and available for renewing the subscription within 6 months.

Subscriptions must be for a minimum 12 months to receive the annual rate. Existing licenses will be extended and prorated to expire on the same date.

Local Server and Dedicated Server options have a minimum \$10k license order plus \$5k/year server install, setup, support, and maintenance fees.

Multi-Year Discounts paid up front are 5% for 2 years, 7.5% for 3 years, and 10% for 4 years.

Volume Discounts are 5% for 10+ users, 10% for 20+ users, and 15% for 40+ users on the same purchase order on annual subscriptions only.
